---

SDT – Southern Diversified Technologies, Inc., headquartered in Brookhaven, MS and operating in 35 States, was thrilled to learn recently that we have been ranked in the 2008 Inc. 500 top 5000 list, which celebrates the fastest growing private companies in America. We placed 83 in the top 100 fastest growing telecom companies in America.

This recognition has further assured us that our commitment to focus on integrity, quality and customer satisfaction through all phases of infrastructure development has truly been the correct path to follow in order to assure our company's growth and success.

SDT's principals and management have been working in the telecommunications industry as contractors or former telecom employees for over 30 years. Since our inception in 1993, we have been true to our name and have continued to expand its "diversified" package of services.

We appreciate our customer's loyalty and are dedicated to continue growing our widely diversified portfolio of telecom services beyond the current Outside Plant Construction and Engineering; Inside Plant Installation and Maintenance; Staffing and Managed Services, DC Power Services; Real Estate and Right of Way Services; Disaster Readiness and Recovery; Wireless Services; Structured Cabling; Facilities Management Support; and others.

We look to the future with great excitement, and will continue to adapt and lead as technologies and philosophies continue to evolve in the telecommunications world.
